Civil Defence Measures.

State of Public Opinion. The War Cabinet had before them a Report by the Civil Defence Committee on the State of Public Opinion as regards Civil Defence Measures (W.P. (G.) (39) 159).

The Secretary of State for Home Affairs said that the members of the Civil Defence Committee were concerned at the increasing tendency, reflected in the Press, to regard the Government's policy in regard to Civil Defence measures as unnecessary and even to take the line that there would be no air raids and that the sooner life could return to normal the better. The Committee therefore

suggested that the hypothesis on which the Government's policy had been based, should be reviewed by the Chiefs of Staff, so that the Government could then announce that they had reviewed their Civil Defence Plans as a whole, and that an examination of all the factors involved led to the conclusion that there was no case for modifying the policy previously adopted.

They had also in mind that some Civil Defence plans, e.g., the provision of hospital beds and fire-fighting arrangements, were based on a quantitative calculation as to the possible results of air raids, and that it might be useful to have an up-to-date calculation on these points.

The Secretary of State for Air said that the Air Staff agreed with the Report of the Civil Defence Committee. Nothing had yet happened to give any adequate grounds for modifying the assumptions made before the war. There had so far been no experience in dealing with heavy sustained air attacks on the scale previously envisaged, and, if attacks took place, there was no assurance that they could be completely prevented, especially if they took place at night. They fully realised that the precautions were a great burden on the country, but their existence might be one of the reasons why heavy attacks had not materialised, and it would, in their view, be a grave mistake to relax them. They considered it very important that steps should be taken to counter the spirit of false optimism, as suggested by the Civil Defence Committee, and that the Press should be induced not to give the impression that the defences were perfectly capable of dealing with the much heavier attacks which might yet eventuate.

War Cabinet Minutes 121 (39) November 1939?

FOR FRESS & BROADCAST.

Morrison Shelters in Recent Air Raids.

A report of Ministry of Home Security experts on 39 cases of bombing incidents in different parts of Britain covering all those for which full particulars are available in which Morrison shelters were involved shows how well they have stood up to severe tests of heavy bombing.

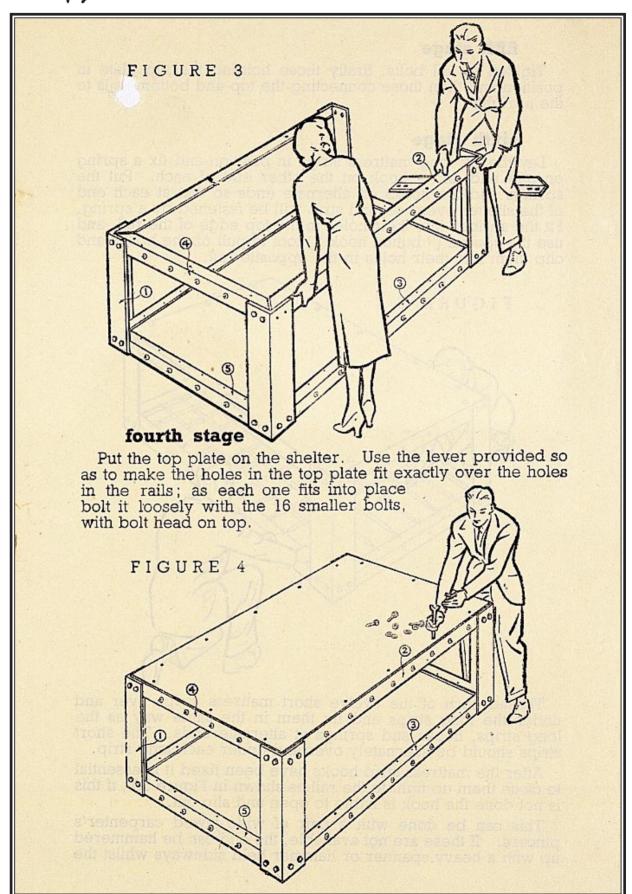

All the incidents were serious. Many of the incidents involved direct hits on the houses concerned a risk against which it was never claimed these shelters would afford protection. In all of them the houses in which shelters were placed were within the radius of damage by bombs; in 24 there was complete demolition of the house on the shelter.

A hundred and nineteen people were sheltering in these "Morrisons" and only four were killed. So that 115 out of 119 people were saved. Of these only 7 were seriously injured and 14 slightly injured while 94 escaped uninjured. The majority were able to leave their shelters unaided.
